PROFESSIONAL SUMMARY

Final-year B.Sc. Computer Science student (expected graduation 2027) seeking an entry-level Python Developer or Software Developer role. Hands-on experience developing Python and Django applications with database-driven features, authentication, role-based access control, validation, reporting, and data processing. Strong foundation in Object-Oriented Programming (OOP), SQL, DBMS, CRUD operations, debugging, testing, SDLC, and Git/GitHub collaboration, with additional exposure to Microsoft Azure.

EDUCATION

B.Sc. Computer Science	College of Computer Science and Information Technology (COCSIT), Latur 2024 - 2027	CGPA: 9.36/10
HSC / Class XII	Dayanand Science College, Latur 2022	72%
SSC / Class X	Shri Deshikendra Vidyalaya, Latur 2020	87.80%

TECHNICAL SKILLS

Programming Languages: Python, Java (Core), SQL

Backend & Web: Django, Django ORM, HTML, CSS, JS

Databases: MySQL, SQLite

Cloud: Microsoft Azure, Azure Fundamentals

Engineering Concepts & Tools: Object-Oriented Programming (OOP), DBMS, CRUD, Authentication, Role-Based Access Control (RBAC), SDLC, Debugging, Functional Testing, Data Validation, Git, GitHub, PyCharm

PROJECTS

1. CloudWise - Cloud Cost Advisor | Python, Django, Pandas, JavaScript

Repository: github.com/manav-jagtap/CloudWise

- Developed a Django-based application that processes cloud resource utilization data using Python and Pandas and classifies resources as idle, underutilized, normal, or overutilized.
- Implemented rule-based optimization recommendations, estimated monthly cost savings, dashboard results, and downloadable CSV reports for resource analysis.
- Built reusable CSV data-processing and validation flows, strengthening practical experience with backend logic, data handling, debugging, and Django application structure.

2. PrepX – AI-Powered Online MCQ Exam & Practice Platform (Team Project) | Python, Django, Bootstrap, SQL

Repository: github.com/PrepX-Team/PrepX

- Contributing to a Django-based role-driven examination platform supporting Admin, Teacher, and Student workflows with secure authentication and Role-Based Access Control (RBAC).
- Worked on question-bank validation, difficulty-level controls, database-driven features, and functional testing of user and examination workflows.
- Collaborated through Git/GitHub branches and pull requests, applying structured debugging, testing, version control, and team-based software development practices.

3. TurfPay - Turf Booking Platform | Python, Django, Bootstrap, SQLite

Repository: github.com/manav-jagtap/TurfPay

- Developed a Django-based turf discovery and booking platform supporting customer and turf-owner workflows for viewing turfs, checking slots, and managing bookings.
- Implemented turf and booking management with owner/admin CRUD operations, booking details, slot-based availability, and database-driven workflows.
- Built a responsive web interface with Django templates and Bootstrap, using SQLite for development and structured backend models for Turf, Booking, and Owner data.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) | July 2026
- HackerRank: Python (Basic)
